**THE BATTLE OF COFFEEVILLE.**

Further News from the Battle Field of Green-

wood, Tennessee.

CASTLIGNE STEVENS,

Franklin, June 26, 1859.

I wrote you a few days back after it had been fought, the battle of Coffeeville, and I have now a somewhat distinct account of its details, as far as I can get, from the official reports, and the letters from friends most noted, which appear in the Paris and New York papers. I will copy out the letter, and will tell you all you will care to know about the battle, and the specific operations of the several corps engaged.

All I shall attempt, therefore, will be to give you a general idea of the battle, for the non-professional reader more impressed by the scenes of war than by the details of its movements, as my time at present allows.

Not far from two days after its occurrence, I wrote you a few days back after it had been fought, the battle of Coffeeville, and I have now a somewhat distinct account of its details, as far as I can get, from the official reports, and the letters from friends most noted, which appear in the Paris and New York papers. I will copy out the letter, and will tell you all you will care to know about the battle, and the specific operations of the several corps engaged.

At Opel the thermometer stood at 114 in the shade, for three consecutive hours. At Cold Spring, 120. At Mountain Springs, 120. At the river, 120. At Mountain Springs, 120. The mercury ranged about 100 between the 1st and 2nd of July. The mercury was placed in a frame building. On Thursday, the 1st, the thermometer stood at 100 degrees; and as we write (Friday afternoon) the mercury is only up to 95—and all hands say that it will not rise much higher.

The mercury rose to 100 on Monday to

Wednesday, and again to 100 on Tuesday.

The Viceroy has ordered that the subject whom the subject was referred, to political squabbles and the ballot box.

The mercury was up to 100 on Tuesday.

On Wednesday last, the thermometer to 100.

On Wednesday last, the
